CSCD 378

Assignment 4: Calendar

Specification:

The aim of this exercise is to display the calendar for a given year and month from user.

Example: By choosing the month **February** and the Year **2020**, then click on the "Update Calendar" button, we get the screen output.	

To do so follow these steps:

1) Create your html code that should contains:
   a. Input box (box should be filled with the selected year and month)
   b. Div for calendar
   c. Select list for months
   d. Select list for year
   e. Button "Update Calendar"
2) Create the array **theMonths** and initialize it with the names of the months.
3) Write the function **Calendar (year, month)** which reads the month and the year selected, then display the corresponding calendar when clicking on "Update Calendar"
4) Add the following to your calendar:
   a. Color the cell in red If the day is current day
   b. Sunday cells in blue

TO TURN IN:
